## DETAILED ACTION

### ***Allowable Subject Matter***

**Claims 1, 4 - 21** are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Consider independent **claims 1, 15, and 21**, the best prior art found during the examination of the present application is **Leivian et al. (USPN 6,580,973)**.

In view of the present application, Leivian discloses an in-vehicle hands-free method and apparatus that comprises sensors to detect the surrounding situation of the driver and the vehicle and controls the hands-free call operation if a hazardous driving situation is currently occurring. In addition, while the hands-free call is ongoing and a hazardous situation occurs, then the call is placed on-hold temporarily and the caller is given an option to leave a voice message or continue holding.

Compared to the present application, Leivian fails to disclose storing the voice of the party on the other during the telephone communication between the user and the party. In addition, Leivian does not disclose call state after the hold where the playback unit is operable to continue to suspend the output of the voice of the party and play back the voice of the party that was stored in the storage unit and then enables the voice of the party for telephone communication.

In light of the above cited and other examiner cited references, the present application and invention is novel and non-obvious since the cited prior arts of record do not contain either explicitly or implicitly the limitations as disclosed in independent claims 1, 15, and 21. In addition, any reasonable combination of the cited references

cannot be used to reconstruct the claimed invention. Therefore, the present application as disclosed is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
